Beskrivelse:

Angelbird CFexpress 2.0 Type B memory cards

CFexpress 2.0 Type B memory cards are engineered for maximum sustained performance, offer protection from overheating, and operate at a reduced power draw. Ensure the highest bit-rate captures of your RAW video and continuous shooting photography files at resolutions up to 12K.

When it comes to CFexpress, the industry would have you believe that maximum speed is the lead indicator of quality performance. Let's be real. Camera technology has a wide gap to close before coming even close to exhausting the speed capabilities of CFexpress recording media.

You need proven, reliable, SUSTAINED PERFORMANCE that can optimize RAW recording at 4K, 6K, 8K... up to 12K resolution AND keep you recording for longer periods.
