### Beskrivelse:

#### AMARAN AL-MX LIGHTING UP!

Filmmakers loved the original AL-M9. But based off of the feedback we received from you, our users, we decided to make one that was even brighter and more versatile - the AL-MX. Designed with a metal build and SMD LED bulbs, the AL-MX is the most durable, powerful, bicolor LED light that can easily fit into your pocket.

#### *Expanded Color Temperature*

The AL-MX features a 5-step adjustable color temperature ranging from 2800-6500K. While most bicolor lighting fixtures range from 3200-5600K, this expanded range provides you with even more options for creative applications.

#### *Metal Build*

The AL-MX is compact and durable. Made of aircraft-grade aluminum and featuring an extremely efficient heat management system, the AL-MX is built to last for years in conditions of all kinds. In addition, with a 1/4 screw and universal cold shoe mount, you can easily install the AL-MX on cameras, light stands and so on.

#### *Portable Design*

The AL-MX inherits the M9's legacy. Though a bit thicker in build, it has the same "credit card sized" design and weighs just 278g. In addition, with a built-in lithium rechargeable battery and USB Type-C charging port, the MX lasts an average of 1 hour at full power and 4 hours at minimum power.

#### *Boost Mode*

The AL-MX also comes with a bonus Boost option, which goes above 30% of maximum brightness when you need that extra kick. Capable of operating at 60-second intervals, boost mode gives filmmakers one more option for when "the brightest ever" still isn't enough.

#### *Constant Light Output*

AL-MX has a new form of technology that increases its reliability. While many lights dim as battery life decreases, the output of the AL-MX remains the same no matter the remaining battery life, environment, temperature or any other factors.

## Specifikationer:

Producent	Aputure
Kategori	LED lys
CRI	95
Strøm/batteri	Lithium-polymer battery 3.7v 800mAh
Lysstyrke	0,3m: ≥2400LUX 0,5m: ≥880LUX 1m: ≥200LUX
Længde	9.3
Bredde	6
Dybde	2.4
Vægt	280
Farvetemperatur	2800K-6500K
Leverandør	Aputure
