### Beskrivelse:

#### *Cambo Actus AC-371 Rear Base Tilt Kit Front*

AC-371 adds an extra base tilt adjustment to your Actus camera's rear standard. This kit is a retrofit for all existing ACTUS cameras, Mini, B, G, and DB versions.

The rear base tilt unit mounts between the rear standard focussing unit and the monorail, and makes an extra layer of sliding focus too. An additionally included feature is that this layer allows for 42mm more focus draw, compared to the original configuration.

Incremental settings upto 15 degrees are set and locked with a positive lock.

AC-371 gives you more creativity in applying technical camera movements.

#### *Specifications:*

- Additional weight: 0,26 kg
- Additional height: 20 mm
- Additional focusdraw: 42 mm
- Rear base tilt: +15 / -15 degrees
- Increments: each 5 degrees.
