Beskrivelse:

Canon WFT-E9B Wireless File Transmitter

- Fast, reliable 802.11ac Wi-Fi, with dual 2.4 GHz and 5 GHz frequencies and MIMO antennas
- Control your camera from a smart device, shooting from unusual perspectives
- Link up to 10 EOS-1D X Mark III cameras and shoot at a range up to 100 m

Add Wi-Fi to your EOS C500 Mark II camera or enhance the built in Wi-Fi on your EOS-1D X Mark III, with the WFT-E9B wireless file transmitter. Enjoy strong, stable, long-range connections even in digitally congested venues, such as sports stadiums, thanks to multiple in multiple out (MIMO) antennas and the 802.11ac Wi-Fi standard, which uses both 2.4GHz and 5GHz bands. When working with the EOS-1D X Mark III, the WFT-E9B lets you use a smart device to control the camera over greater distances than the camera's built-in Wi-Fi allows. You can also shoot directly to secure SFTP servers wirelessly. On the EOS C500 Mark II camera the WFT-E9B lets you live stream on-line and send footage to suitably equipped newsrooms from location. You can also capture footage from unusual creative angles by using a smart device to view, control and shoot.

WFT-E9B benefits

- Fast data transfer via the 802.11ac standard
- Operates on both 2.4 GHz and 5 GHz bands to combat interference from congestion
- Multiple In Multiple Out (MIMO) antennas improve speed and reliability
- Link up to 10 EOS-1D X Mark III cameras and shoot over ranges up to 100 m
- Shoot, view and control your camera remotely via a smart device
- Secure File Transfer Protocol over FTP/FTPS/SFTP
- Use your smartphone or tablet to capture and transfer your shots remotely via Canon Camera Connect App

Specifikationer:

Producent	Canon
Kategori	Wi-fi sender
Passer til (kamera)	Canon 1DX MK III
Leverandør	Canon
