Beskrivelse:

The TetherPro USB-C to USB-C cable

The photographer's choice for tethering a USB-C camera to a computer with USB-C ports. It allows for a straight connection with no adapters or dongles. USB-C is also fully reversible, so no matter how you plug it in, it's always right side up.

The TetherPro USB-C to USB-C cable is available in the following lengths to provide photographers with the right length for their need:

- 0.9m
- 1.8m
- 3m
- 4.6m

TetherPro USB cables are constructed to the highest USB specifications and incorporate all of the latest technology ensuring consistent and reliable conductivity for fast and reliable transfers.

As technology innovation marches forward, computers, cameras, and storage devices are converging and require significantly more bandwidth to maintain the interactive experience users have come to expect. Designed to the highest USB specifications to filter out signal noise and reduce transmission errors, all cables are fully shielded and plated to protect against external signal interference.

Key Features

- Streamlined connection from your USB-C computer to USB-C Camera
- Available in high-visibility orange and non-reflective black

Note: This cable is for data transfer only. Do not use for powering devices
