Beskrivelse:

RØDE VideoMic Pro

- Professional-quality on-camera condenser microphone
- Supercardioid polar pattern for capturing focused, directional audio
- Super lightweight (only 85g)
- High-pass filter and three-stage gain control
- Powered by 9v battery with over 70 hours use
- Integrated Rycote® Lyre® shock mounting for superior isolation from handling noise
- High-quality windshield for recording outdoors

The VideoMic Pro is a professional-grade on-camera microphone designed to deliver exceptional audio in a wide range of recording applications. Compact, lightweight, and super versatile, there's a reason it's become the industry standard microphone for vloggers, filmmakers, and content creators.

Step Up Your Audio Game

With its broadcast-grade condenser capsule and tight supercardioid polar pattern, the VideoMic Pro delivers high-quality directional audio that is the industry standard. It's the perfect microphone for vloggers, filmmakers and content creators looking to seriously step up their audio game.

Always Ready to Adapt

The VideoMic Pro offers a range of useful features to help you adapt to your recording situation. This includes a high-pass filter for minimising low-end rumble caused by environmental noise like traffic and air conditioners and a three-stage gain control for ensuring your recording levels are perfect every time you shoot. The VideoMic Pro is powered by 9V alkaline battery, which provide over 70 hours of charge.
