Beskrivelse:

Dedicated to the FUJIFILM X-T3 mirrorless camera, the VG-XT3 Vertical Battery Grip benefits shooting in the vertical orientation and also accepts two additional NP-W126S rechargeable lithium-ion batteries for extended shooting times. In terms of its physical design, the extended shape incorporates a secondary shutter release button as well as a focus lever, AE-L button, AF-L button, front and rear command dials, Q button, and Fn button to mimic the camera's own layout for intuitive handling. Additionally, the grip is also water, dust, and freeze resistant to the same degree as the camera body to maintain its ability to function in harsh conditions.

Goecker for shooters

Specifikationer:

Producent	Fuji
Kategori	Batterigreb
Passer til (kamera)	Fuji X-T3
Leverandør	Fuji
