Beskrivelse:

Fujinon XF 35mm f/1,4 R

- Fast, compact f/1.4 prime with lots of character
- 53mm (full frame equivalent)
- 8 elements in 6 groups, including 1 aspherical element
- Physical aperture ring with tactile feel
- Unique, characterful bokeh and rendering
- Rounded 7-blade diaphragm
- Afrundet 7-blads blænde

With a fast F1.4 aperture, the 35mm XF lens (135 equivalent: 53mm) is perfect for low light shots.

Featuring an all-glass aspherical lens and other elements, the lens is polished to perfection and treated with Super EBC coating while the high-quality metal barrel and precision-machined 1/3-step aperture ring gives versatile control.

Excellent out-of-focus bokeh are achieved thanks to the design of the moulded aperture diaphragm blades. The blades are curved to create a circular image at all aperture settings, while the very edges of each blade are meticulously rounded off rather than simply cut off, which delivers a sharper image.

Specifically designed to maximise the mirror less design of the X-Pro's body, the X-Mount has a short flange back distance of just 17.7mm giving high resolution right across the image.

Specifikationer:

Producent	Fuji
Kategori	Objektiv
Objektiv type	Prime
Brændvidde type	Wide-angle
Objektiv mount	X (Fuji)
Kompatible mounts	X (Fuji)
Fullframe	Nej
