Beskrivelse:

Hahnemühle Protective Spray protects digital Fine Art prints from external influences. The aerosol spray lays like a fine film on the paper, without changing the paper structure. It fixes colours of pigment-and dye ink and prevents an eventual colour fading also the intensity and the high brilliance of the colours stay permanently.

The coating increases the abrasion resistance of Fine Art papers, so the risk of fingerprint marks and scratches are reduced.

Protective Spray makes the sealing of the surface water repellent. The improved formulation is fast drying and virtually odourless. A yellowing of the print due to the spray is not possible.

Advantages of the formula:

- No yellowing
- Easy to apply
- Virtually odourless
- Permanent stay of intensity and the high brilliance
- Fast-drying
- Protects and seals the print
