Beskrivelse:

HASSELBLAD XCD 45mm f/4

The XCD 4/45P is the world's lightest digital medium format autofocus lens on the market today, weighing 320g (0.7 lbs). Its compact, lightweight build combined with world class optics makes it the perfect lens for travel, exploration, and documentary. As the most lightweight member of the X System lens range, its size perfectly complements the compact X1D II body.

Like the other XCD Lenses, the XCD 45P has an integral central shutter offering a wide range of shutter speeds and full flash synchronisation up to 1/2000s.

The XCD 4/45P takes high quality imaging even further out into the world. Designed for the utmost in portability, the 45P stands as the most lightweight and compact member of the XCD lens family. Weighing in at only 320g (0.7 lbs), about the same as a professional hot-shoe flash, this makes it the world's lightest digital medium format autofocus lens on the market today.

The XCD 45P allows photographers to bring high quality optics on any adventure, ranging from travel photography across deserts and up mountains to urban exploration and documentary. Minimal weight combined with superior image quality, the XCD 45P coupled with the X1D II and Phocus Mobile 2 lets creatives go physically further with their creative visions with lighter gear in their kit and a highly portable workflow.

HIGH QUALITY OPTICS IN COMPACT DESIGN

The XCD 45P features an optical design incorporating two aspherical elements, resulting in state-of-the art optical performance within compact dimensions. With a minimum focus distance of 35cm (13.8 in) and a maximum image scale of 1:5.2, the XCD 45P is even suitable for food or still life photography. Its mechanically connected focus ring gives the lens a responsive and accurate manual focus experience. Just as the other XCD lenses, the XCD 45P is uncompromising in its build quality, technical excellence, optical performance, and balance in handheld use in addition to its built-in leaf shutter that allows for flash sync up to 1/2000s.

MINIMAL SOUND - DISCREET PORTABILITY

The XCD 45P has been designed with discreet portability in mind and thanks to evolved designs, both the autofocus motor and leaf shutter have been reduced in audible noise. Photographers will find that the new XCD 45P leaf shutter is less audible than many focal plane mechanical shutters.

Specifikationer:

Producent	Hasselblad
Kategori	Objektiv
Objektiv type	Prime
Brændvidde type	Normal
Objektiv mount	Hasselblad X
Kompatible mounts	Hasselblad X
Fullframe	Ja
Billedestabilisator	Nej
Autofokus	Ja
Linseelement / Gruppe	9 / 7
Maks synsvinkel	61°
Nægrænse	35
Største blænde	F/4
Mindste blænde	F/22
Brændvidde	45
Diameter	80
Længde	52
Vægt	320
Filter diameter	62
Leverandør	VICTOR HASSELBLAD AB
