Beskrivelse:

PRODUCT FEATURES

- Full frame compatible
- Ultra macro 2.5 - 5x
- Compact and lightweight
- Fast f/2.8 aperture.
- Great optical performance
- Extended working distance
- Up to 5:1 magnification

Want a compact, versatile super macro lens? Look no further! The Laowa 25mm f2.8 2x-5x Ultra Macro is here, the most compact and versatile high magnification macro lens on the market.

Optimized for macro shooting between 2.5X - 5X life size and specially designed with an extended working distance (45mm at 2.5x & 40mm at 2x) and smaller lens barrel. This allows a sufficient lighting on the object for easier shooting in the field. Much more compact and lighter than other comparative products. The 25mm f2.8 ultra macro also provides a relatively greater depth of field compared to other extreme macro lenses currently available. The Laowa 25mm f/2.8 2.5-5X is developed for both professional and enthusiast macro photography, to be used in every situation.

An affordable extreme macro lens and full frame compatible, but perfectly at home on smaller sensor cameras also. This is a full manual lens, with no electronic connections. With a wide focal length of 25mm, photographers have the added bonus to shoot with deeper depth of field than when using longer focal length macro lenses. This may be especially useful when focus stacking multiple images which will require stacking of lens shots if using a wider focal length lens due to an increased depth of field.

Goecker for shooters

Specifikationer:

Producent	Laowa
Kategori	Objektiv
3. parts objektiv (passer til)	Pentax
Macro	Ja
Linseelement / Gruppe	8 / 6
Maks synsvinkel	10.3 degrees
Nægrænse	17
Blændelameller	8
Største blænde	F2.8
Mindste blænde	F22
Brændvidde	25
Diameter	65
Længde	82
Vægt	400
