### Beskrivelse:

Crisp and brilliant, highly versatile light source.

The WideZoom Reflector has much in common with the popular Magnum Reflector, but creates a wider and strikingly even light spread. These unique features have made the WideZoom Reflector favored among fashion photographers in need of a crisp, brilliant main light or perfectly even background illumination.

- Light spread: 80° at position 10, 50° at position 7 and 40° at position 4.
- Output at 2 m with 2,400 Ws @ ISO 100: f/64.6 at zoom position 6
- Features Profoto's unique zoom function - shape the light by simply sliding the reflector back and forth on the head.
- Designed to withstand years of professional use.
- Narrow the light spread with the optional Grids.

# Goecker for shooters
