Beskrivelse:

Limits the light spread from your OCF Softbox Rectangular

You can attach an optional Softgrid on your OCF Softbox to reduce the light spread to 50°. The softgrid creates a more directed light and eliminates a large amount of spill light, allowing you to shape the light with even more precision.

Important to note:

Only recommended for Profoto off-camera flashes with LED modeling light; B1X, B2 and the former B1. May not be used with D1 and D2 monolights or standard heads.

Profoto OCF Softgrid 50° 2x3' features

- Limits the light spread to 50°
- Easy pull-over mounting technique for fast setup
- Compact and lightweight
- Made with high-quality fabrics
- Delivered in a labeled soft pouch

Goecker for shooters
