Beskrivelse:

Reduces light spread and controls straylight

Light shaping is the key to creating amazing images. Profoto Clic light shaping tools provide many creative possibilities for the Profoto C1 Plus, A1X and A1. Each light shaping tool has its own distinct effect on light.

Clic Grid reduces the light spread, controls stray light, and adds contrast and drama to the final image. And here the word 'control' really is key: with Clic Grid attached, it's easy to control and focus the light where you want it, while limiting the light spillage in other areas of the image. Use it to shape your key light, create background effects in portraits, or accentuate the highlights in still life photography - you'll find so many creative ways to use it.

Clic Grid clicks on and off in no time with the lights' magnetic mount. It is stackable with compatible light shaping tools, enabling limitless creative possibilities.

Profoto Clic Grid 20° Features

- Adds contrast and drama
- Easy click-on magnetic mount
- Stackable with compatible light shaping tools
