### Beskrivelse:

It is more than a softbox. It is a Light Shaping Tool.

The larger the light source is in relation to the subject, the softer the light will be. This simple fact is perhaps the most important lesson to learn about light. It is also the main reason why our rectangular softboxes come in so many sizes. With five sizes to choose from, you are guaranteed to always find the right tool for the job.

- Compatible with well over 20 flash brands, thanks to our speedring adaptors.
- Deeper shape and recessed front for precise control.
- Double-layered diffusers and a highly reflective silver interior.
- Optional accessories, such as the Softgrid, the Stripmask and the Flat Front Diffuser, allow for even more precise light shaping.
- Color-coded speedrings and Velcro attachments result in hassle-free assembly and disassembly.
- Designed to withstand years of professional use.

## Specifikationer:

Producent	Profoto
Kategori	Softbox
Form	Rektangulær
Bredde	40
Højde	60
Dybde	34
Udskiftelig dug	Ja
Taske medfølger	Ja
