### Beskrivelse:

A popular, versatile softbox

Hugely popular, the RFI Softboxes come in all shapes and sizes to provide the most light shaping control. The larger the light source is in relation to the subject, the softer the light will be. This simple fact is perhaps the most important lesson to learn about light. It is also the main reason why our rectangular softboxes come in so many sizes. With five sizes to choose from, you're guaranteed to always find the right tool for the job.

### Profoto RFI Softbox 4x6' Features

- Creates a soft and flattering light
- Deeper shape and recessed front for precise control
- Double-layered diffusers and a highly reflective silver interior
- Made with high-quality fabrics
- Color-coded rods and Velcro attachments mean hassle-free assembly and disassembly
- Requires an RFI Speedring (sold separately). Offered for all major flash brands
- Use with an optional softgrid or flat front diffuser for even more precise light shaping
- Designed for years of everyday use
- Delivered in a labeled soft bag
