Beskrivelse:

It is more than a softbox. It is a Light Shaping Tool.

Strip softboxes are often used as rim lights that effectively separate the subject from the background. They are also favored by product photographers requiring a long and narrow reflection with soft edges. In addition, they are a great asset when you are shooting in a confined area.

- Compatible with well-over 20 flash brands, thanks to our speedring adaptors.
- Deeper shape and recessed front for precise control.
- Double-layered diffusers and a highly reflective silver interior.
- Optional Softgrid allow for even more precise light shaping.
- Color-coded speedrings and Velcro attachments result in hassle-free assembly and disassembly.
- Designed to withstand years of professional use.

Specifikationer:

Producent	Profoto
