- The strap length is adjustable with 160cm maximum length and 110cm minimum length
- The features memory foam inside of the ergonomic shoulder pad, brings a more comfortable carrying experience
- Rapid link Connectors allowing quick attachment/detachment of the gimbal strap

SmallRig Gimbal Shoulder Strap KPAC2466 is designed for better carrying and operation of a gimbal. It comes with 2 mini plates featuring 1/4"-20 screw to mount on a clamp, handgrip, plate or other gimbal accessories with 1/4"-20 thread holes, like SmallRig Mounting Clamp for DJI Ronin S Gimbal 2221, SmallRig Rod Clamp for Zhiyun Crane2/Crane V2 2119, and SmallRig Handgrip for DJI Ronin S BSS2314, etc., to finally attach the strap to a gimbal.

It can be worn as a sling, neck or shoulder strap. The strap features a dual-layer nylon webbing, and an ergonomic shoulder pad filled with memory foam which is thermo-compression formatted, helps relieve the pressures and pains on your shoulder and neck caused by longtime shooting and brings more comfortable carrying experience. The strap length is adjustable, the maximum length is 160cm and the minimum length is 110cm, to fit people with different sizes.

The unique Rapid Link system allows quick attachment/detachment of the gimbal strap and provides your gimbal a safer carrying way.

Note:

The gimbal strap must use together with a SmallRig clamp, handgrip, plate or other accessories for gimbals with 1/4"-20 thread holes, and those accessories are not included.
