Beskrivelse:

SmallRig 3232 L Bracket for Fujifilm GFX 100S and GFX 50S II

SmallRig L Bracket 3232 is designed for quick switch between vertical and horizontal shooting and for better grip experience. It locks the camera via 1/4"-20 screws on the bottom and features rubber pads to prevent scratching and twisting. Both the baseplate and side plate are of Arca-Swiss standards with center marks. The side plate can be extended to the left if more room is needed for tethering or cable release. The bottom plate comes with a strap slot for carry strap.

Additionally, the L plate features multiple 1/4"-20 threaded holes on the side and bottom for accessory attachment. A flat head screwdriver is included to secure the camera screw and stores on the bottom of the L bracket.

Compatibility:

- FUJIFILM GFX 100S
- FUJIFILM GFX 50S II

Package Includes:

- 1 x L Plate
- 1 x Allen Wrench
